FEATURES-SPECIFICATIONS

KILLARK® CertiLite®V Series sets a new standard for industrial grade HID luminaires. Designed for installations where moisture, dirt, dust, corrosion and vibration may be present, these fixtures are suitable for NEMA 3 and 4X areas and where wind, water, snow or high ambients can be expected. They also can be used in locations made hazardous by the presence of flammable vapors and gases or combustible dusts, as defined by the NEC®. Typical applications include manufacturing sites, chemical and petrochemical processing facilities, sewage treatment plants, off-shore and dockside installations, garages and warehouses.

Standard Materials:

- Ballast tank and splice box – corrosion resistant copper-free aluminum alloy with baked powder epoxy/polyester finish, electrostatically applied for complete, uniform corrosion protection.
- All external hardware – 316 stainless steel.
- Guards – Painted copper-free aluminum alloy or 316SS for 7-3/4" glass optics and Enclosed Reflectors.
- Spin-top Refractor Guards are Plated Steel.
- Reflectors – lightweight, corrosion resistant polyester reinforced fiberglass, or copper-free aluminum.

Additional Features:

- Seven mounting splice box types; Pendant, Flex Pendant, Ceiling, Wall bracket, Cone Top, 25° Angle Stanchion, Straight Stanchion – in a variety of entry sizes, including M20 for the VMX ceiling style.
- Quartz auxiliary, HPS instant restart, Ballast Protectors
- Minimum starting temperature: HPS – 40°C; MV, MH & MHP – 30°C
- Normally shipped as components for fast delivery, or may be ordered factory assembled with or without lamps.
- Options for fuses and Quick Disconnect

Compliances

- UL1598 Standard for luminaires
- UL1598A Marine type luminaire
- UL-844 Standard for lighting fixtures for hazardous locations
- CSA C22.2 no. 137-M1981 electric luminaries for use in hazardous locations
- Enclosed and gasketed
- NEMA 3, 4X IP66
- UL 60079-15 - Electrical apparatus for Explosive Gas Atmospheres with Type of Protection "n" (Restricted Breathing and non-sparking).

| NEW FEATURES | BENEFITS |
|--|--|
| Swing-Barrel Nut Tank Mounting System | <ul style="list-style-type: none"> • Stainless-to-Stainless securement • Takes load off during installation • Uses ordinary tools • Saves time and labor |
| New ballast tank sizes | Cover a wider range of wattage sizes and socket types (will include five total) for maximum user selection flexibility |
| Sealed Optic Zone 2 AEx nAR Restricted Breathing (suffix NR) | NO External Seals. Lower T-codes, Suitable for Class I Div. 2 Classified areas per the NEC® |
| All glass refractors | Compact (5-1/2" thread size, types I & V) Standard (7-3/4", thread size, types I, III, V) Enhances user selection flexibility |
| New "EZ" mount adapter | Easier Maintenance, saves labor, move fixture from the ladder to the workbench |
| Photo controls - Class I Div. 2 / N4X areas | Available as Field or Factory Installed to save energy when light not required |
| Earthquake Tab - Built-in attachment point for safety cables | Safety: Secures fixture to structure in case of conduit failure. "3rd hand" accessories for lamp change out |
| "FULL CUTOFF" & CUTOFF Optics | For "Dark Sky" Requirements. Helps to minimize offending light pollution |
| VMEP40 "Food Optic" | Expanded Offering for Food or Grain Handling Applications to minimize contamination |
| NEMA Decals | Easier Maintenance, Saves labor "Have the right lamp in hand before going up the ladder". |
| 15 17 17P 17 | Philips® QL Induction type and 600Watt HPS available for long life or high lumen requirements |
| CertiLite Software | Used to determine number of fixtures required and their proper layout for various tasks and applications. |

KILLARK®

SWING-BARREL NUT

Hang
Fixture

Swing into Place

Tighten

- The CertiLite®V Swing-Barrel Nut System provides a Stainless-to-Stainless securement between tank and mounting box. No more Stainless-to-Aluminum connections or need for Stainless inserts.
- Users can easily lift the tank into place and "take the load off," then tighten. Saves time and labor.

- Only the patent pending Swing-Barrel Nut Stainless System can be tightened with a common screwdriver or nut driver; others are either stainless-to-aluminum, or require a wrench or special deep socket.

NOTE: CertiLite®V series tanks are backwardly compatible with older CertiLite® mounts. Simply remove Barrel Nut and thread into old mount.

EZ MOUNT & LAMP IDENTIFICATION

To enable easy and safe removal of CertiLite®V fixtures for future maintenance, install with the new VMEZA ballast tank to EZ mount adapter.

The complete assembly is removed for maintenance at the workbench.

Large facilities often keep spares so that a "new" fixture is put in at the time one needs maintenance – thus eliminating the need to set up access equipment multiple times.

HAVE THE RIGHT LAMP IN HAND BEFORE GOING UP THE LADDER.

* "P" designates newer Pulse Start Metal Halide lamps:
150, 175, 200, 250, 320,
350 and 400 watt models.

& Wattage

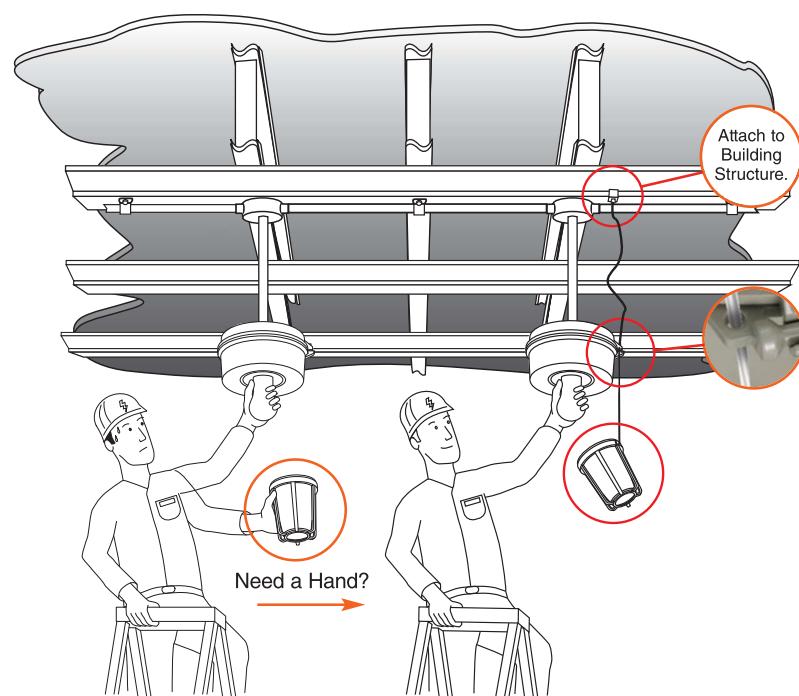

"3rd HAND" & EARTHQUAKE SUSPENSIONS

Maintenance personnel are often in awkward positions when relamping: trying to simultaneously hold on to a ladder, a globe and the lamp. Available "3rd Hand" suspension cables support 5-1/2" VMG17/VMR17x optics, utilizing the VMAG17 guard. 7-3/4"

VMG25/VMR25x optics utilize a band (w/cable) which attach to special nubs on the optic. Cables attach to a special "Earthquake Tab" built into the ballast tank housing. See Suspension Accessories in Killark Catalog.

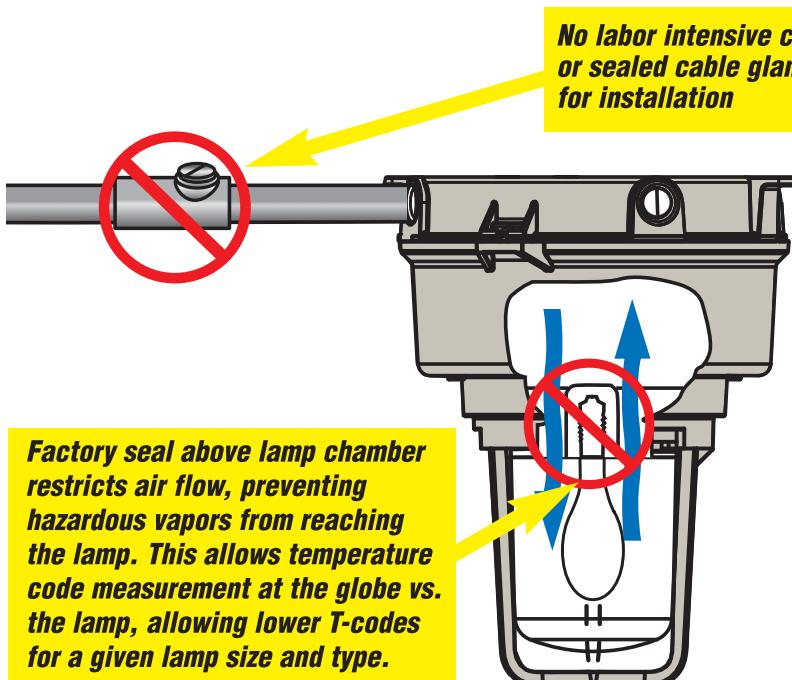

CertiLite®V tanks as standard have a built-in "Earthquake Tab." The tab is used to hold optic suspension devices, and can simultaneously be used to add a safety cable linked to the building superstructure.

LOWER T-CODES

NEW "Sealed Optic" construction, option "NR". Rated for Class I, Zone 2 AEx nAR II Restricted Breathing. "Sealed Entry" is no longer required to obtain significantly lower T-codes.

- CertiLite®V luminaires with the NR option are factory sealed to save installation time and labor costs.
- AEx nAR II (also AEx nA nR II) is covered under NEC® Article 505, and indicates Non-Arcing and Non-Breathing.
- North American Class I Division 2 designated locations may use properly marked Zone 2 rated equipment per NEC Article 501.5.
- The CertiLite®V NR option is available for VMG, VMR, and VMER40 optics, but not VZRG "Spin-top" Refractors.
- Permits the use of fewer higher wattage luminaires for a given application.

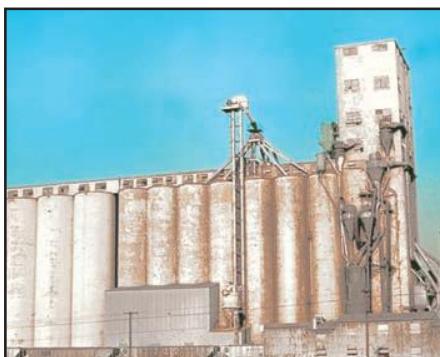

See the Benefit!

| Lamp Type and Wattage | Examples at 40°C ambient See Thermal Performance Charts Beginning LXXX for more information | Class I Div. 2/ Zone 2 Based on Lamp Temperature Data | Class I Zone 2 AEX nAR II Based on Globe Temperature Data | Reduction in Applied T-Code |

KILLARK®

FOOD & GRAIN SAFETY

Grain Area

VEMP40 Optic
(Prototype Shown)

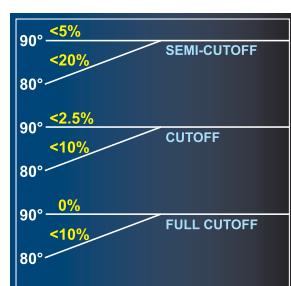

Certification (Pending)
Class I Div. 2; Class II Div. 1;
N4X; NSF

- CertiLite®V VM4 or VM5 series luminaires with the new VMEP40 Optic have a strong non-glass polycarbonate shield protecting food from potential broken glass contamination, as could be the case even with heat-resistant heavy duty globes.
- Unique design incorporates internal glass lens to seal out dust and vapors from the lamp, with a polycarbonate shield banded tightly at the bottom.

- Copper-free aluminum reflector is painted white for easy cleaning; threaded portion at top is natural aluminum to prevent paint dust contamination during maintenance (from attaching/detaching).
- Polycarbonate shield is replaceable and must always be used to maintain ratings.

DARK SKY APPLICATIONS

- The CertiLite®V VMER40 Enclosed Reflector meets the “Full Cutoff” photometric requirement in many areas, such as observatories, to minimize offending light pollution. Fits VM4 and VM5 Series tanks.
- “Dark Sky” Kits are available to enable the deep HRD-400 Series Reflectors meet this requirement over globes on the VM4, “Full Cutoff” or “Cutoff” on VM5 Series tanks. See Killark Catalog for more information.

COMPETITIVE COMPARISONS

CERTILITEV®
The Logical Choice

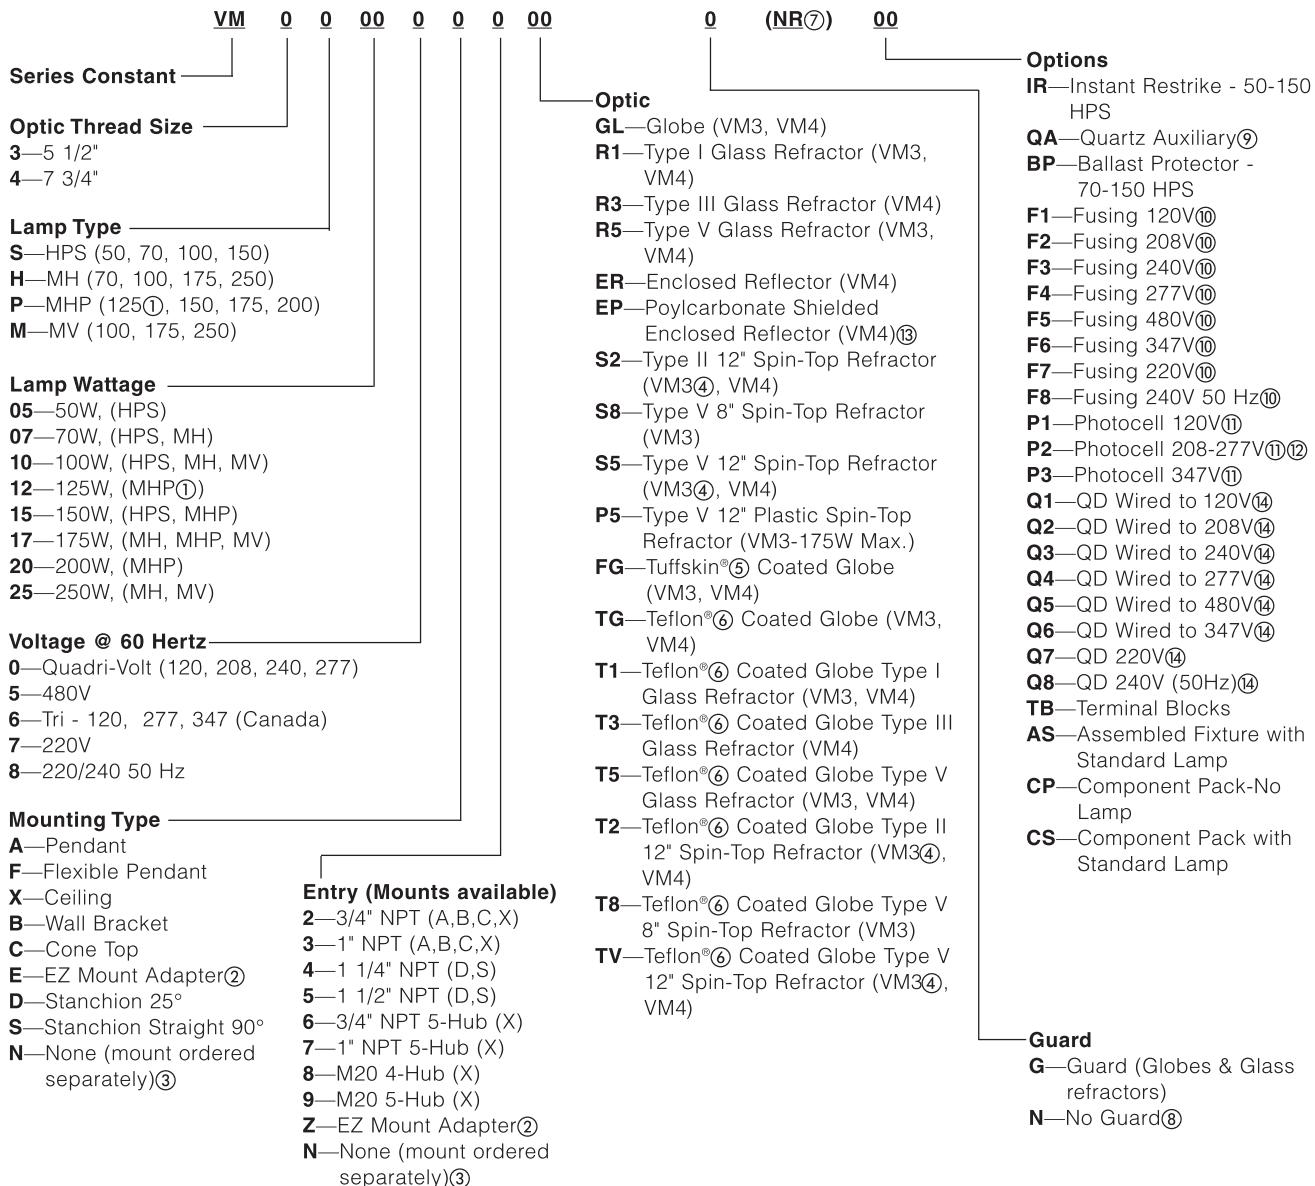

| CertiLiteV® KILLARK | | vs. | COMPETITION |
|---------------------|---|-----|--|
| | Swing-barrel nut Stainless-to-Stainless securement between tank and mounting box. Can be tightened with a common screwdriver or nut driver. | | Either not stainless, or require a wrench or special deep socket. |
| | Earthquake tab Built in securement location for safety cables, optic "3rd Hand" or to building structure. | | Not Available |
| | Maintenance Safety Optic suspension systems | | Not Available |
| | Suspension safety cable to building superstructure | | Not Available |
| | "Sealed Optic" Instead of more costly "Sealed Entry" Meets AEx nAR Requirements | | "Sealed Entry" requires extra parts (conduit seals) and labor to install, and block pulling of replacement wiring. |
| | VMEP40 Food Area Suitable Optic | | Only Glass Optics Offered |
| | Dark Sky Optics Available | | Limited, if any, solutions for light pollution, a problem in many areas. |
| | 316 Stainless Guards For 7 3/4" All Glass Optics. Optional Bottom Closure. | | "Ordinary" stainless & open bottom type only. Provides less protection from bottom impact or corrosion. |

KILLARK®

CERTILITE® V CATALOG NUMBER LOGIC - LOW WATTAGE (MOGUL BASE) HID

① Special order lamp type/wattage not shown in grids, minimums apply.

② Completes as "EZ", conduit mounting boxes ordered separately.

③ NN mount ordered separately.

④ 12" Spin tops for use with VM3 tanks ship with a Mogul to Mogul socket extender for enhanced photometrics vs. 7 3/4", which are used on VM5, but will fit VM4.

⑤ Tuffskin® is a registered trademark of Thomas Mfg. Corp.

⑥ Teflon® is a registered trademark of DuPont, Inc.

⑦ AEx nAR Restricted Breathing - See page 3 for more information.

⑧ Order Guards for Spin-Tops & VMER40 separately.

⑨ QA not suitable for Class I, Div. 2/Zone 2 applications; consult factory for other hazardous applications.

⑩ Fusing not for Marine or Canadian installations.

⑪ Photo cells for Class I, Div. 2 only.

⑫ Field connection to proper tap in case of Multitap Ballasts.

⑬ Not for use with wall or straight (90°) Stanchion.

⑭ QD = Quick Disconnect. Allows easy tank removal for maintenance. Electrician simply unplugs de-energized ballast from supply circuit.

Cone & Wall MHP models shown. Consult master catalog for other mounts, accessories and hazardous location application data.

① See hazardous application data in Killark Catalog for limitations.

② Globe catalog number shown with guard. To omit guard, change G to N; e.g. VM5P250C2GLN. Order spin top and enclosed reflector guards separately.

③ Catalog numbers shown are with 3/4" conduit openings, change 2 to 3 for 1"; e.g. VM1S250C3GLG.

④ Consult catalog logic for other available voltages.

⑤ Add suffix NR for ExnR restricted breathing; see page 3 for more information.
