## 

# 9040/9062 **Phase Rotation Indicators**

New

#### Take the guess work out of phase/motor rotation measurements

#### **Fluke 9040**

The Fluke 9040 is effective for measuring phase rotation in all areas where threephase supplies are used to feed motors, drives and electrical systems. The Fluke 9040 is a rotary field indicator and can provide clear indication of the 3 phase via an LCD display and the phase rotation direction to determine correct connections. It allows rapid determination of phase sequence and has a voltage (up to 700V) and frequency range suitable for commercial and industrial applications. Test probes supplied with the instrument have a variable clamping range for safe contact, especially in industrial sockets.

#### Fluke 9062

The unique Fluke 9062 provides rotary field and motor rotation indication with the benefits of contact-less detection. Purpose made for commercial and industrial environments, the Fluke 9062 provides rapid indication of 3 phase rotation using test leads supplied or can be used to determine motor rotation on synchronous and asynchronous 3 phase motors. The contact-less detection is ideal for use on motors where the shaft is not visible. Test probes supplied with the instrument have a variable clamping range for safe contact, especially in industrial sockets.

#### Features

	9040	9062
3 phase indication	Via LCD	Via LED
Indication of phase rotation	•	•
Indication of motor rotation direction		•
Contact free determination of the rotation direction of running motors		•
Clear LCD display	•	
No battery required	•	

#### Specifications

9040	9062
40-700V	Up to 440V
-	120-440V AC
15-400Hz	2-400Hz
Continuous	Continuous

Power supply 9040: from unit under test Power supply 9062: 1 x 9V Weight 9040: 0.20 kg Weight 9062: 0.15 kg Two Year Warranty

#### Fluke 9062 applications

Check the correct rotation of motors prior to connection.
